## Storage

Store in an approved area. Store in a well-ventilated place. Store in original protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials, food & drink. Carefully reseal opened containers, tightly closed & keep upright. Store locked up. Avoid all possible sources of ignition, spark or flame. Do not store in unlabelled containers. Do not tamper with the container. Do not re-use container. Use appropriate containment to avoid environmental contamination.

## Environment

### Spillages:

#### Small spill:

Stop leak if without risk. Move containers from spill area. Use spark proof tools and explosive proof equipment.

Dilute with water and mop up if water soluble. Alternatively, or if water-insoluble absorb with an inert dry material and place in an appropriate disposal container. Dispose of via a Licensed Waste Carrier

#### Large spill:

Stop leak if without risk. Move containers from spill area. Use spark proof tools and explosive proof equipment.

Approach the release from upwind. Prevent entry into sewers, water courses, basements & confined areas. Contain and collect spillage with non combustible absorbent material eg sand, earth, vermiculite or diatomaceous earth. Place in container for disposal in accordance with Local Regulations. Dispose of via a Licensed Waste Carrier. Contaminated absorbent material may pose the same hazard as the spilt product

### Transport:

Solids containing flammable liquid

### Disposal:

Waste must be disposed of in accordance with Local Regulations and Environmental Control Regulations

The generation of waste should be minimised or avoided wherever possible. Waste packaging should be recycled, incineration & / or landfill should only be considered when recycling is not feasible

Do not tamper with the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally

Avoid dispersal into soil, waterways, drains and sewers

This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Vapours from product residues may create a highly flammable or explosive atmosphere inside the container.
