L = Likelihood is the chance that a hazardous event will occur. C = Consequence is the outcome of the hazardous event. Residual risk is measured after the controls have been put in place, deemed as an acceptable R = Risk

Likelihood	1 = Very unlikely	2 = Unlikely	3 = Fairly likely	4 = Likely	5 = Very likely
Consequence	1 = Insignificant	2 = Minor	3 = Moderate	4 = Major	5 = Catastrophic

Hazard	Who can be harmed & how	Risk Rating			Control measures in place	Residual Risk		
		L	C	R		L	C	R
Use of substances hazardous to health	Personnel undertaking the task, Minor irritation through contact.	2	2	4	Company policy to substitute harmful substances with green substances wherever practical.	1	1	1
Use of bladed equipment	Personnel undertaking the task, serious injury potential i.e. lacerations / cuts.	3	4	12	All work equipment provided is in line with best practice advice. All bladed equipment is contained within safety holder / shield. Use of cut resistant gloves when using equipment / changing blades. All blades covered when not in use.	2	4	8
Interaction with members of the public	Persons undertaking the task and others who may be affected. Serious injury potential.	3	4	12	Personnel trained in safe working procedures including setting up of work locations in public places and conflict management. Any concerns are reported to line management as necessary. Lone working procedure may apply. Use of physical barriers as separation and warning signage as necessary.	2	4	8
