- Apply cleaning agent as necessary. Method of application decided at location
- Allow cleaning agent to penetrate for recommended time
- Perform test wash / proceed or allow additional time
- Wash area ensuring overspray is kept to a minimum
- Pay attention to water run off
- Remove barriers and signage
- Check area and leave in a safe condition prior to hand over to client

Risk Assessments

The supervisor / team leader will be in possession of all task and site specific risk assessments for this project. He will have ensured that all members of the team have been either briefed on them or had the opportunity to read through them. The team are fully aware of the legal obligations placed upon them to comply in full with the control measures and strategies set down in all assessments and statements effecting their operations.

The client is requested upon the receipt of this method statement and prior to the arrival on site of the team, to inform all other contractors and operatives on site who will be in the vicinity of our operations.

Emergency Issues

Where practical, a minimum of a qualified one day appointed person (First Aid) will be available. The person will upon arrival at the site identify themselves to the site manager / agent. They will further familiarise themselves with the first aid procedures for the site.
