Environment

Spillages:

Small spill:

Stop leak if without risk. Move containers from spill area. Use spark proof tools and explosive proof equipment.

Dilute with water and mop up. Alternatively absorb with an inert dry material and place in appropriate disposal container. Dispose by licensed Waste Carrier

Large spill:

Stop leak if without risk. Move containers from spill area. Use spark proof tools and explosive proof equipment.

Approach from upwind. Prevent entry into sewers, water courses, basements & confined areas. Contain and collect spillage with non combustible absorbent material eg sand, earth, vermiculite. Place in container for disposal in accordance with Local Regulations. Dispose by licensed Waste Carrier

Transport:

Turpentine Substitute

Disposal:

Waste must be disposed of in accordance with Local Regulations and Environmental Control Regulations as product may be deemed as hazardous waste

Do not tamper with the container. Avoid dispersal into soil, waterways, drains and sewers

The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous
